Ângelo Azevedo

Lisbon, Portugal ang3lo@azevedos.eu.org angelo-azevedo ang3lo-azevedo @XXXX +351 XXX XXX XXX

Computer Science student specializing in **cybersecurity**, focusing on **security engineering** and **vulnerability research**. **Scout since age 7**, drummer, and skimboarder, with an active interest in **cinematography** and **multimedia**. Practical background in **forensics**, **incident response**, and **platform hardening** across red-team audits, academic labs, and CTFs.

Education

Instituto Superior Técnico *2025 - Present*
M.Sc. in **Computer Science and Engineering** *Lisbon, Portugal*
*Specialization in **Cyber-Security & IT Systems*** **GPA 17/20**

Instituto Superior de Engenharia de Lisboa *2022 - 2025*
B.Sc. in **Computer Science and Computer Engineering** *Lisbon, Portugal*

Experience

Teaching Assistant (CSF) *Aug 2026 - Nov 2026*
Instituto Superior Técnico (IST)
- Teaching Assistant for the **Cybersecurity Forensics (CSF)** course, designing lab exercises and grading the practical final projects for 100+ students.

Forensics Instructor *2026*
Security Team @ Técnico (STT)
- Taught hands-on **memory and disk forensics** workshops for 30+ STT members using Volatility and Autopsy (*link*).

Red Team & Security Auditor *Feb 2026 - Present*
Er3bUs Security Team (Técnico)
- Led a 5-member team conducting a penetration test and code audit on the GameCourse platform.
- Found and documented 4 critical vulnerabilities in staging, proposing patches to the maintainers.

Course Instructor & Research Grantee *Oct 2025 - Present*
Instituto Superior Técnico (IST)
- Instructor for the **Programming & Electronics** course (OASIS project), guiding students through **Arduino**, **IoT**, **sensors**, and **3D printing** projects.
- Taught practical STEM and robotics workshops for youth through the **Oeiras Educa** initiative.

Programming Teacher *Dec 2024 - Jun 2025*
SharkCoders
- Taught **Python**, algorithmic thinking, and robotics to classes of 15+ students aged 8 to 17.

Projects

root-my-nothing (Android Vulnerability Tooling) *2026*
- Ported the **CVE-2026-43499 (GhostLock)** futex vulnerability to Nothing Phone (1), extracting kernel struct offsets with pahole and building an Android NDK and Kotlin app to deploy KernelSU.

Voltage OS Android & Kernel Trees *2025 - Present*
- Maintained **Linux 5.4 kernel** and device trees for Nothing Phone (1), configuring custom builds, **KSU-SUSFS** root-hiding integration, and hardware abstraction (HAL) for an active community of **20+ users**.

Samsung Galaxy Book Linux Hardware Fixes *2026*
- Contributed to Linux hardware support on Galaxy Book laptops by automating **Secure Boot module signing** via Kbuild, developing **systemd runtime services**, and building userspace camera controls.

Console Binary Reverse Engineering (Switch) *2026*
- Reverse-engineered ARM64 binaries (**Mario Kart 8 Deluxe**) in **IDA Pro**, isolating NVN capability checks and using **pwndbg** over an **Atmosphere GDB stub** to hijack the UI state machine and test enabling Switch 2 features on Switch 1.

NixOS Security Workstation & NUR Packages *2024 - Present*
- Engineered a **declarative NixOS security workstation** with modular environments for forensics and reverse engineering, maintaining **95+ security packages** in NUR (*link*) including custom Volatility 3 plugins and LEAPP triage tools.

Awards

Academic Excellence Award
2022
Received excellence award for **best new students**

Skills & Languages

Security & Forensics Wireshark, Burp Suite, Ghidra, IDA, Volatility, Autopsy, YARA, Frida, GDB

Programming & Scripting Python, Bash, C, Go, Java, Kotlin, JS/TS, SQL, Nix

Systems & Infrastructure Linux, Android (AOSP), NixOS, Windows, Docker, Git, CI/CD, Ansible

Interests & Activities Scouting (since 7), Drums, Skimboarding, Cinematography

Languages **Portuguese** (Native), **English** (Fluent)

Cybersecurity Competitions

ECSC & Cybersecurity Challenge PT
2026
- Selected as **Team Captain** for the **National Team** at the 2026 ECSC (*link*), having qualified through the CSCPT (*link*) to represent **Portugal**.

BSides Lisbon CTF *2025*
- **2nd Place** - Solved forensics, web, and cryptography challenges in a 24-hour competition on the biggest portuguese cybersecurity event.

Security Team @ Técnico (STT) *2025 - Present*
- Técnico's Student CTF Team (#1 in Portugal, 245th worldwide). Active international competitor.
- Focus on **forensics**, **web**, and **reverse engineering** challenges.

r4ph3cks CTF Team *2022 - Present*
- **Founder & Leader** of university CTF team.

Personal CTF Write-ups *Present*
- Publishing detailed **CTF write-ups** and **scripts** at *github.com/ang3lo-azevedo/ctfs*.

Self-Hosted Infrastructure & Networking *2024 - Present*
- Administering a **Debian-based homelab** running **Docker/Portainer** to deploy and manage self-hosted privacy services (Nextcloud, Immich, SearXNG).
- Configured an **NGINX reverse proxy** for secure external access and implemented an automated **NAS backup strategy**.
